![BeamReady ...light when needed most]

Install a BR-1000 In the window of any child, elderly, or disabled person:

The BR-1000 is triggered by any smoke detector alarm audio within 30 feet. The device will illuminate a multicolored high intensity flashing LED in the window of the individual.
The BR-1000 will also shoot a high intensity laser beam out the window that will cut through any smoke and give the fireman and rescue teams a direct path to the person's room.

Install a BR-1000 s In the hallways of any building:

The BR-1000 will shoot a high intensity laser beam that illuminates through the air and smoke to a safe passageway to the nearest exit point in any building.
